## **Enlarged Editorial Committee**

TC-EDC/Mar21/4

Original: English

Geneva, March 23 and 24, 2021 **Date:** February 24, 2021

## MATTERS TO BE RESOLVED CONCERNING TEST GUIDELINES PUT FORWARD FOR ADOPTION BY THE TECHNICAL COMMITTEE: LAGERSTROEMIA

Document prepared by the Office of the Union

Disclaimer: this document does not represent UPOV policies or guidance

- 1. The Enlarged Editorial Committee (TC-EDC) at its meeting held in Geneva, on October 24, 2020, considered the draft Test Guidelines for Lagerstroemia (*Lagerstroemia* L.) (document <u>TG/95/4(PROJ.4)</u>) and agreed that it required editorial clarifications to be provided by the Leading Expert. The TC-EDC agreed to reconsider the draft Test Guidelines at its meeting to be held in March 2021.
- 2. Recommendations from the TC-EDC on the draft Test Guidelines for Lagerstroemia are presented in the table below, including the required editorial clarifications (indicated with "#") and responses from the Leading Expert, Ms. Stéphanie Christien (France):

Cover page	"Crepe Myrtle" should be added as there are 2 alternative spellings for the English common
	name
	Leading Expert: agreed
3.1.1	to be replaced with the 2 following paragraphs:
	"The minimum duration of tests should normally be two independent growing cycles.
	"The two independent growing cycles may be observed from a single planting, examined in
	two separate growing cycles."
	Leading Expert: agreed
Char. 2	to check whether to be indicated as QN
	Leading Expert: We prefer to keep it as it is (PQ with 3 levels of expression)
Char. 4	to check whether to delete MG
	Leading Expert: agreed
Char. 5	to check whether to delete MG
	Leading Expert: agreed
Char. 7	state 2 to read "on margin"
	Leading Expert: agreed
#Char. 10	- to read "Leaf blade: undulation"
	- to check whether to reduce scale to 5 notes (According to Ad. 10 the difference between
	1 and 5 does not seem to be sufficient for a difference of 9 states)
	Leading Expert: We prefer to keep it as it is: "Leaf blade: undulation of margin", as we want
	to assess the undulation of the margin of the leaf blade and not the undulation of the leaf
	blade. We agree to reduce the scale to 5 notes as follows: absent or very weak (1), weak
#O! 47	(2), medium (3), strong (4), very strong (5)
#Char. 17	to check whether to read "area of anthocyanin coloration"
01 00	Leading Expert: agreed
Char. 20	state 1 to read "globose", state 2 to read "conic"
01 04 05	Leading Expert: agreed
Chars. 24, 25	to be moved after characteristic 28
01 - 00	Leading Expert: agreed
Char. 29	to have notes 1 and 2
	Leading Expert: agreed
